Veteran Care Navigator Program

Community Care Network-Rutland Mental Health Services' Veteran Care Navigator program is designed to provide specialized support to Veterans and active-duty service members and their immediate families, ensuring timely and coordinated assistance for those who have served our country.

The program was strategically developed by professionals who are deeply committed to honoring the service of Veterans and understanding the challenges they face. With compassion and respect, the program helps break down barriers to care and ensures Veterans don't fall through gaps in the healthcare system.

THE PROGRAM PROVIDES:

- Care coordination to individuals for all health care needs, including both mental and physical health
- Substance use treatment
- Veterans' benefits and housing assistance
- A range of other services and supports based on individual client needs

The program is equipped to help individuals and families with a wide range of intricate challenges including the lingering effects of trauma, service-related injuries, difficulty accessing resources, and stress and emotional burden carried by family members and caregivers, both during and after an individual is deployed.

As a state-designated Certified Community-Based integrated Health Center (CCBHC), Community Care Network is committed to providing equitable, accessible and comprehensive care to all members of our community.
